# 4WD MUD & SNOW CHAINS

TO SUIT MOST CARS / 4WD'S / TRUCKS

Piranha Off Road Products is a wholly-owned Australian company, assembling a comprehensive range of mud and snow chains for car, truck and 4WDs. We provide personalised service with a full range of spare parts.

With many years of off-roading experience, we are more than pleased to advise and help people when and how to use chains. All Piranha chains are designed and built to provide you with the optimum grip, traction and provide a comfortable ride without compromising performance on the road. So when it comes time for you to choose your chains, what you should focus on is not just price but on how, and what the chains are made of and by who. Whatever the conditions, whatever the road, you will always feel comfortably in control driving with Piranha best quality steel chains for your wheels.

## IT PAYS TO BE SAFE

When climbing hills, fit the chains to the rear wheels because due to gravity 70% of the whole vehicle weight is transferred to the rear. With the additional grip of the chains, you will keep mobile and steady. If you're going downhill, fit the chains to the front wheels, but if you're covering all conditions then chain-up all four wheels. Protection of the environment is paramount and driven intelligently, a chain-equipped vehicle will cause less track damage than one without chains.

### The Ultimate Truck & Heavy Vehicle Chains.

- Chains for Commercial, Farming, Forest Mining and Quarry Applications.
- Piranha Off-Road Products manufacture log skidder, truck and tractor chains.
- We make chains that fit balloon tyres, mowers, garden and earth moving equipment.

**ALL CHAINS MADE TO ORDER**  
Alterations and repair service available. Piranha can modify existing chains while you wait.
